

## Research Group on Anesthesiology and Reanimation Consolidated group

<http://www.Anestesiyclinicovalencia.Org>

### Group members

#### Principal investigator

Francisco Javier Belda Nácher  
Hospital. University  
H Index: 18

#### Collaborating researchers

Marina Soro Domingo. Hospital. University  
Gerardo Aguilar Aguilar. Hospital  
Carlos Ferrando Ortola. Hospital  
José García de la Asunción. Hospital  
Beatriz Garrigues Olivé. Hospital

Juan Vicente Llau Pitarch. Hospital. University  
Rafael Badenes Quiles. Hospital  
Armando Maruenda Paulino. Hospital. University  
María Luisa García Pérez. Hospital  
Carlos Tornero Tornero. Hospital. University  
Benigno Escamilla Cañete. Hospital  
María Luisa Laredo Alcázar. Hospital  
Arturo Carratalá Calvo. Hospital  
Jaime Pérez-Griera. Hospital  
José Miguel Alonso Iñigo. Hospital  
Blanca Arocás Chicote. Hospital  
José Antonio Carbonell López. Hospital  
Pedro Charco Mora. Hospital  
Mario de Fez Barberá. Hospital  
Mar Garzando Civera. Hospital  
Andrea Gutiérrez Valcárcel. Hospital  
Irene León Carsí. Hospital  
Mª José Parra González. Hospital  
Ernesto Pastor Martínez. Hospital  
Jaume Puig Bernabéu. Hospital  
Ana Mugarra Llopis. Hospital  
Laura Reviriego Agudo. Hospital  
Estefanía Gracia Ferrandiz. Hospital

#### Emerging researcher

Carlos Ferrando Ortolá. Hospital

## Strategic aims

- The effects of advanced monitoring on hemodynamic management in critically ill patients.
- Open lung approach for the acute respiratory distress syndrome.
- Stratification and outcome of acute respiratory distress syndrome.
- Recommendations on invasive candidiasis in patients with complicated intra-abdominal infection and surgical patients with ICU extended stay.
- Pharmacokinetics of anidulafungin during venovenous extracorporeal membrane oxygenation.

## Main lines of research

- Studying gases used in anesthesia: halogenated agents, xenon and oxygen; and the effects of anesthetics; oxidative stress and protection of organs in ischemia-reperfusion surgery.
- Study of hyperglycemia and aldose reductase-mediated mitochondrial dysfunction and apoptosis in platelets in critical patients.
- Ventilatory and pharmacological strategies to decrease organ damage in the lungs associated with mechanical ventilation in healthy and injured lungs.
- To study safety and potential benefit in terms of protection of halogenated agents during prolonged sedation.
- Development of hemodynamic monitoring and its application in the field of patients undergoing surgery or admitted to critical care units.
- Study and development of instruments and drugs to quantify or involved in different pathways of hemostasis in two ways: prevention of thrombotic complications and bleeding prevention in the perioperative period.
- Study and development of methods of detection of infections, especially fungal and virological, and how to prevent them.
- Development of neurological monitoring and study measures to protect brain damage.
- Development of new strategies and drugs for pain treatment.

### Emerging researcher

*Carlos Ferrando Ortolá*

Some of the ongoing research lines in our group that I am leading are:

1. Role of anaesthetics in the inflammatory response in anaesthesia and critical care patients.

2. Strategies to optimize and individualize intraoperative ventilatory management (precision medicine)

3. Role of the perioperative ventilatory strategies in postoperative complications. Protocol published in Trials (Ferrando et al. Trials 2015). This multicenter randomized controlled trial was performed in 20 Spanish Hospitals and enrolled 1012 patients. Currently we are drafting the manuscript for a high IF Journal.

4. Role of perioperative supplemental oxygen in postoperative complications. We are going to start a multicentre randomized controlled trial with a sample size of 756 patients in 26 Spanish Hospitals to investigate whether an individualized perioperative approach with High versus Conventional FIO<sub>2</sub> prevents postoperative SSI (Clinicaltrials. Gov NCT02776046. PI: Carlos Ferrando).
