GENERAL INFORMATION

ANESTHESIOLOGY RESEARCH SEMINARS 2018

The Anesthesiology Research seminars consist of three scientific days during the month of December 2018.

These seminars are held in the afternoon so that the attendance of researchers, both basic and clinical, can be compatible with their working day.

The activity is aimed at researchers in general and other professionals working in the field of biomedicine.

The conferences are monographic and cover the areas of respiratory, airway and pain, and are aimed at updating the results of the latest research.

The speakers, men and women, are national and international experts on the subject, all of them of recognized prestige.
